

SPRING is my favorite season because it is the time for new beginnings to take bloom and to reawaken HOPE. By feeling warmer days and having more sunshine that was missed throughout the cold, wintry months, Spring provides new promise, inspiration, and rebirth. It's a time when our bodies soak up the sunshine. The sun's rays help our bodies produce Vitamin D and release the serotonin in our brains, giving an uplift in our mood and creating hope. Why is HOPE so important? Psychology Today reports that HOPE is important in a patient's health and well-being because it manages their stress and depression giving them the will to keep looking for a way to relieve their painful conditions or medical adversities. Patients find greater possibilities to keep going when they are reminded there is HOPE.

That's where you become important in their lives. Patients seek your medical expertise to help them find relief for their acute and chronic painful conditions. Their "HOPE SPRINGS ETERNAL" that against all odds you can give them a better quality of life with less pain by regaining their independence. Patients living with chronic pain are turning to you for a more effective, safer, non-invasive, and holistic approach to help manage their pain, reduce their prescription drug usage, help them return to work, and back to the active lifestyle they once enjoyed. Simply getting a good night's sleep is a blessing. But there is HOPE!

H.O.P.E.
HOLD ON, PAIN ENDS

RST-SANEXAS neoGEN® Electric cell -Signaling Technology (EcST) utilizes specific time varying therapeutic energy waves along with resonant frequencies and associated harmonic frequency hopping programs that targets and transcutaneously penetrates deeper into the affected area. These sophisticated, ever-changing, highly targeted, and combined AM and FM electro-energy waves make it almost impossible for the peripheral and central nervous system to find ways to accommodate or anticipate the next upcoming signal. The neoGEN® device creates different physiological and therapeutic effects for your patient's treatments allowing the recovery process to begin and giving pain relief for a multitude of physical conditions. Besides relieving acute or chronic (long-term intractable) pain, the neoGEN® system can boost blood circulation, relax muscle spasms, prevent or retard muscle atrophy, help prevent phlebothrombosis, maintain or increase range of motion, and help muscular reeducation.

Feeling less pain can be life changing for patients. Page 2 spotlights two doctors that have given HOPE back to their patients with RST-SANEXAS neoGEN® Electric cell-Signaling Treatments (EcST). Enjoy their stories and please feel free to send me your stories to share as well.

Robert H. Odell, MD, PhD.
Neuropathy and Pain Center of Las Vegas Las Vegas, NV

“Over the years, I found that the RST-SANEXAS advanced electromedical neoGEN® device produced favorable results for patients suffering from pain associated with neuropathy and other painful conditions. After becoming an interventional pain management specialist, I was likely the first substantial user of the RST-SANEXAS technology (since 2003). I co-authored many of the RST-SANEXAS research papers in using the quantum-based advanced technology to relieve pain for patients with the most challenging conditions. Our clinical protocol is the gold standard around the country for treating distal symmetric neuropathy. There are many imitating it, but results are always optimized with the use of RST-SANEXAS neoGEN® system.”

“Regarding some of the other pain conditions that I have treated, many of my patients come in as a last resort hoping I can relieve their pain and reduce their pain medications. One diabetic patient suffered with peripheral neuropathy, but her pain got worse when she was bitten on her foot by a recluse spider. After almost giving up on her life, she saw one of my TV commercials and decided she had nothing to lose and called the next morning for an appointment. She was taking a substantial amount of opioids, enough for a 300 pound male, but she was a small, young woman. Her neoGEN® treatments were done twice a week for 4 months. She improved, stopped taking her medications, and returned to the active lifestyle she enjoyed. Her hobbies included water skiing, hiking, and she returned to a rescue organization that she volunteered with. *She told me, “I am enjoying my life again! Opioid free. Something I never thought would happen! I am me again, doing the things I love.”*

Jennie

“As an Anesthesiologist and Interventional Pain Management Physician, I have treated thousands of patients like her and they have found HOPE. With the RST-SANEXAS neoGEN® device as well as other interventional pain treatments and procedures performed at Neuropathy and Pain Center of Las Vegas, my staff and I take great pride in treating a broad spectrum of debilitating conditions successfully. Our greatest reward is to relieve our patient’s chronic pain, and RST-SANEXAS is the cornerstone of those efforts.”

Jason Kelberman, DC, BCIM.
Westside Wellness Center Los Angeles, CA

“Hi, I’m Dr. Kelberman. My specialty within the chiropractic field is called Chiropractic Kinesiology. I have treated thousands of painful feet in athletes of all types over the last 38 years. For the last 18 years I have been helping restore function and balance to people who have had chronic severe pain. The RST-SANEXAS neoGEN® is the most amazing break-through device I’ve seen in the last 18 years filling a void in my practice. I now give patients with pain and even with severe numbness HOPE. We are seeing real changes in symptoms that were previously untreatable.”

Here is what one of my patients had to say.

“I have been seeing Dr. Kelberman for treating my peripheral neuropathy. This machine has made a huge difference in a really short period of time, and I am extremely grateful.”

Susan

Thank you Dr. Odell and Dr. Kelberman for sharing your testimonials. To all of you restoring your patient’s HOPE, we would love to hear your stories, too. Email them to joan@rtsanexas.com

SPRING FORWARD with
Huge Savings
on

neoGEN® System ~~\$49,500~~
for only
\$40,995
+ Shipping & Tax (if applicable)

CLINICAL BENEFITS

- Safe, effective, non-invasive and user-friendly treatment
- Minimal potential for side effects, easily avoided
- Extremely high patient compliance, outcomes and satisfaction
- Substantial reduction in out-bound patient referrals
